Juan David Colonia Aldana

Cali, Colombia · LinkedIn · GitHub · +57 320 237 2493 · juandavidcoloniaaldana@gmail.com · Portfolio

Systems Engineer with a solid foundation in software development, cloud computing and data. Experienced across the full lifecycle of web and mobile applications: design, development, automated testing, infrastructure as code, CI/CD and production releases, as well as process automation and analytics with Python and Power BI. Databricks Certified Data Engineer Associate, interested in the intersection of software engineering, data and artificial intelligence.

PROFESSIONAL EXPERIENCE

Gases de Occidente — **Cali, Colombia**
Engineering and Projects Intern — *Aug 2026–Present*

- Develop a web application that automates the preparation of the documentation required for municipal permit applications, aiming to reduce manual work and errors in the process.
- Build Power BI dashboards to monitor operations (work orders, industrial customer requests and municipal permits), supporting service-time control and decision-making.

Pistis Group — **Cali, Colombia**
Full Stack Developer — *Oct 2025–Feb 2026*

- Developed the Carpooling vertical of the Pistis app, ensuring code quality, feature integration and the delivery of product milestones.
- Implemented infrastructure with Terraform on Google Cloud Platform and set up CI/CD pipelines for staging and production deployments.
- Managed internal and test builds on TestFlight and Google Play Console, ensuring availability for internal and external validation.
- Coordinated and executed the official release of the app on the App Store and Google Play, meeting store requirements and delivering a stable launch in February 2026.
- Delivered technical documentation and well-organized repositories, enabling project continuity and knowledge transfer to the team.

Universidad Icesi — **Cali, Colombia**
Teaching Assistant — *Jan 2024–Jul 2026*

General Teaching Assistant — *Jul 2025–Jul 2026*

- Provided academic support to students in courses such as Algorithms and Programming, Software Engineering, Discrete Structures, Data-Intensive Systems, Internet Computing, Operating Systems and Project Management, strengthening their technical understanding.

Artificial Intelligence I — *Jul 2025–Jul 2026*

- Supported 90+ students in AI projects using the CRISP-DM methodology, guiding exploratory data analysis, supervised model training and model deployment through REST APIs.

Integrative Project I — *Jul 2024–Jul 2026*

- Advised and mentored 150+ students organized into 25+ project teams, each building a full-stack web application with Python and Django.
- Provided technical and architectural feedback throughout every project phase, including database modeling, RESTful API design and modular backend logic.
- Reviewed and advised on 25+ Jira boards, making sure user stories were written from the end user's perspective and clearly mapped to development tasks.
- Led GitHub workshops on branching strategies, pull request reviews, commit standards and collaborative workflows, improving development practices across all teams.
- Oversaw code quality, testing, debugging and deployment across all projects, helping students deliver fully functional, optimized applications by the end of the semester.

Internet Computing I *Jan 2025–Jun 2025*

- Guided 30+ students through core Internet computing concepts, including the OSI model, packet inspection with Wireshark and socket communication.
- Taught hands-on workshops on RESTful services and client-server models using JavaScript, Express.js, HTML and CSS, reinforcing the practical application of theory.

Applied Mathematics I *Jan 2024–Jun 2024*

- Provided one-on-one support to students applying Python to mathematical problems involving series, sequences, derivatives and optimization techniques.
- Designed inclusive teaching strategies for students with disabilities, including mentoring a visually impaired student to program effectively in Python with assistive tools.

EDUCATION

Universidad Icesi **Cali, Colombia**

B.Sc. in Systems Engineering *Jan 2022–Mar 2027*

- **Academic Achievements:** Dean's List for nine consecutive semesters (2022-1 to 2026-1). Recipient of the Honor and Gold Scholarships from Universidad Icesi and the Generación E Scholarship from the Government of Colombia.
- **Relevant Coursework:** Data Engineering, Data Science, Software Architecture, Artificial Intelligence, Cloud Computing.

CERTIFICATIONS AND ADDITIONAL TRAINING

- **Databricks Certified Data Engineer Associate** · Databricks · May 2026
- **Qversity 2026, Data Engineering Bootcamp** · Qubika in partnership with DataCamp · Feb–Jun 2026. Program with live sessions, mentoring and hands-on challenges. Capstone: end-to-end data pipeline for the fintech sector with Apache Airflow, PySpark, dbt, PostgreSQL and Power BI.

TECHNICAL SKILLS

- **Programming Languages:** Java, TypeScript, JavaScript, Python, SQL, Kotlin, Bash.
- **Frameworks:** Spring Boot, React, React Native, Next.js, NestJS, Express.js, Django, Flask.
- **Databases:** PostgreSQL, MySQL, MongoDB.
- **Cloud:** GCP, Azure, AWS.
- **DevOps:** Kubernetes, Docker, Terraform, GitHub Actions, Jenkins, Ansible, SonarQube.
- **Big Data & Analytics:** Databricks, Apache Spark (PySpark), Apache Airflow, dbt, Power BI (DAX, Power Query).
- **Project Management:** Jira, GitHub Projects, Trello.
- **Soft Skills:** Communication, teamwork, adaptability, leadership, problem solving, time management.
- **Languages:** Spanish (native), English (B2), Portuguese (A1).
